

INTRODUCTION

The Community Giving Program is the holiday gift giving program organized each year by community resource coordinators (CRC's) to coordinate the gathering and dispersing of gifts, clothes, food and toys to Michigan Department of Health and Human Services (MDHHS) clients. Many local MDHHS Community Resource Programs and community service partners participate in the program.

Community Giving Program Survey

During the summer of each year, the CRC specialist will send out a survey, to each county.

Sharing Family Information

The DHS-4086, Community Giving Program Release of Information, forms that are returned to the CRC by clients gives MDHHS permission to share the family's name with organizations interested in giving gifts to needy families. The DHS-4086 includes family information, directions to the home, gift suggestions and special needs.
